Patient A's Invisalign Story

'Patient A' was dissatisfied with her crooked teeth and wanted to straighten them. Preferring an alternative to conventional braces, she chose the discreet option of Invisalign's clear aligners.

Her Journey with Dr Aneeta Thankachan took 18 months and was completed with complementary teeth whitening to achieve the smile she had always dreamed of.

Mr Pordage's Story

Mr Pordage saw Dr Nancy Yousef to do something about his upper and lower front teeth, he had been dissatisfied with the look of his teeth for a very long time and had finally made the decision to take action. It was decided that all of his upper and lower front teeth would benefit from aesthetic porcelain crowns. Crowning them would not only give his teeth a better appearance, but would protect them from further discolouration and fracture.
